INVESTING IN PEOPLE, STRENGTHENING COMMUNITY

OPTIONS INSTITUTE

## **2021-22 Virtual Course Catalog**

Greetings,

Whether you are fully remote or spending some or all your work time in-person, we welcome you back to the new school year.

While we look forward to being able to return to in-person workshops soon, for now our trainings remain virtual.

Workshops will run from 10:00 a.m. to 1:00 p.m. unless otherwise noted. The link to the virtual workshop will be sent the day before the session. You **must be registered** to receive the link and be admitted into the session.

To get the most value from the training, we will occasionally ask that you do some pre-work before the session. This will usually involve reading an article or coming prepared with a case study to share. For the sessions that have workbooks our intent is to send a hard copy to your home or work site. This can only happen if you register early (at least 2 weeks before the workshop) and give complete contact information.

This year we will begin most of our workshops by identifying the competencies (skills, knowledge and behaviors) addressed in the day. Several years ago, we began to dig into the capabilities and practices embedded in our training topics and approaches to answer the question: What are the competencies of a “high performing postsecondary counselor”? The result was the identification of 19 competencies and over 60 practices that exemplify aspirations for our collective work in supporting postsecondary pathways for young people. We trust you will review these competencies and self-evaluate how well you perform the various practices.

Thank you for all you do to support your students in pursuing their postsecondary passions. Their future remains bright because of the work you do and your commitment to your own lifelong learning.

Please peruse the following fall schedule, register for a workshop that interests you, and feel free to share the catalog with a friend or colleague.

# About Options

## Options at Goddard Riverside

Goddard Riverside is a well-established social service agency on the Upper West Side of Manhattan. Goddard's Options Center supports New Yorkers to enroll in and complete college by counseling teens and adults, training school and community professionals, and convening the larger community on critical issues around equity in post-secondary education.

## Options College Counseling

At the heart of the Options Center is our free one-to-one college access and success counseling service. Options supports NYC students through the whole college process, from identifying postsecondary options to choosing an academic and financial good-fit. Options serves over 250 high school juniors, seniors, and young adults yearly.

Once in college the Options Center provides one-to-one advising through college graduation. Services include counseling on and off campus, college supplies, grants to pay for textbooks, and transportation to and from college.

## Options Institute

The Options Institute has drawn on the experience and knowledge of the counseling program to offer training to school- and community-based professionals.

In the late 1990s, the Options Center received funding to replicate its college access model at four NYC non-profits. Informed by the needs of the staff at those new centers, the first Options Foundation for College Access Counseling Certificate Course was developed and offered publicly in 2005. Today, the hallmark program of the Institute continues to be the certificate Foundation Course. The course covers the basic college knowledge and counseling skills counselors need to help young people through the college process. In addition, the Options Institute offers a variety of one-day seminars on topics such as working with immigrant students and advanced financial aid.

Options Institute is New York City's leading provider of professional development in college access and success.

## Why train with the Institute?

For more than 15 years, our mission has been to increase the number of underrepresented young people who gain access to college and earn quality post-secondary degrees. We help realize that mission by empowering professionals with the knowledge and skills they need to be effectual College Access and Success counselors. We accomplish this by training from a practical perspective, using thoughtfully crafted curricula to provide intensive, interactive learning experiences. Committed to adult learning theory, we help participants build on what they know and immediately apply what they learn, leading to measurable results in their on-the-job performance. Since our inception, the Options Institute is proud to have served over 9,000 participants in the New York City area as well as Chicago, Puerto Rico and Portland, Oregon.

# What Participants Are Saying...

"This was the first time I finally got to learn more information about Opportunity Programs and how they work. From my experience, schools handed brochures or the term was thrown around a lot by word of mouth, but no one really knew how to apply for it and most just went with regular CUNY admissions and assumed the finances would still work out because they would get a lot of need-based aid. But now, I actually know more this opportunity and know next steps I can take for students who might be interested/qualify/should know about."

"I definitely learned a lot more about the CUNY and SUNY schools available, especially the Opportunity Programs mentioned. Before, I was only familiar with certain more popular CUNY/SUNY schools, but now I've learned how to incorporate more schools and community colleges and Opportunity Programs - which were more relevant with the student population that I work with at my organization."

"All of the hands on activities were helpful and informative. I appreciate all the stats, links, and will definitely use the strategy session worksheet in the future."

"The facilitators are clearly very kind and open-hearted people, and I really appreciated their humor and obvious love for their jobs and our students."

"...I came from an educational background where a lot of the focus was on the technical/logistical stuff of the college application process. But this class session dived deeper into the more complicated issues and how one would approach students who don't fit into the typical academic student that the college application process might ask for."
